

RPMA ROLLOUT

Coming soon to a market near you, the Machine Network, powered by RPMA, is quickly spreading to markets across vast stretches of the United States. By the end of 2016 it will be the largest IoT-dedicated network in the world.

100,150,755
People covered

Approximately 3 in 10 people in the United States will have direct access to RPMA by the end of 2016

The Machine Network's initial footprint spans larger than **117** individual countries

93,906 Square Miles

The initial rollout of the Machine Network will require only **600 access points/towers** (20x fewer than cellular would require to cover the same area)

A few technology facts...

Data Throughput

UPLINK
capacity per access point
41.03 KBPS

DOWNLINK
capacity per access point
20.51 KBPS

Battery Life

Achieve up to 20 years of battery life

Coverage Reliability

99.9%
